Dear Mr. Sampson,

The attached data represents street sweepings from the City of Beverly.

This set of analysis was a composite sample and discrete VOC sample and represents approximately 1500 CY and 2000 tons of mixed Catch Basin Grit and Street Sweepings.

This letter certifies that the material has not been impacted by a spill of petroleum products, hazardous materials or other impacts, and that the grit and street sweepings are not mixed with any other materials.

If you have any questions please feel free to contact me.

Thank you,

Michael P. Collins, P.E.,
Commissioner of Public Services and Engineering
